# DEVIL PROLINE AEGs

This new line of Proline airsoft gun is a breath of fresh air in the crowd of conventional looking M4s flooding the ranges. Subtle design details set the DEVIL AEGs apart from standard M4 models – the sturdy upper receiver displays an angular shape, the sleek ergonomic pistol grip has a palm swell and a textured surface for better grip. Internally the DEVIL series really stands out. MIM gears running in 8mm bearings, metal cylinder

and piston head. A piston with metal teeth and a quick-change spring guide w. bearing, easily accessible by removing the stock tube. Low-resistance silver wiring for optimized conductivity.

Available with an array of different barrel lengths and front-ends with either quad-rails or keyMod.

## DEVIL COMPACT 5"

Ref. 18349

SHORT AND SWEET  
IDEAL FOR ROOM  
CLEARING

## DEVIL CLOSE COMBAT 7"

Ref. 18350

PERFECT  
FOR OPERATING  
IN CLOSE QUARTERS
