# CZ Scorpion EVO 3A1 Inferno gen 2

**HPA** powered by Wolverine Airsoft®

The popular CZ Scorpion EVO 3 A1 will soon be available as an HPA version. HPA is gaining popularity among Airsoft players around the world, and this will be the first completely factory built HPA EVO.

The EVO HPA version is one of the few if not the only Airsoft gun that is born with the Inferno Gen 2 HPA unit, most others are either custom builds or conversion builds. Due to the unique HPA optimized Hopup bucking (designed by ASG) it is not only ready to shoot straight out of the box – it will also perform like you would expect from an EVO – perfectly without any tweaking or adjustment.

The Wolverine Inferno Gen 2 HPA unit is a single solenoid system (solenoid is the part that switches the valve). Compared to other dual solenoid systems it has improved air efficiency and uses less air. The Gen 2 also utilizes a Hybrid design which allows pause between BB loading and BB firing – this greatly improves stable and even Hop-up application like no other system.

## Features

- Easy programmable control unit – the EVO HPA is controlled by an electronic control unit that is easily programmed by the user, via the trigger (no tools needed). It allows adjustments of rate of fire, burst amounts, fire mode and dwell time.
- Fixed remote line connector with Integrated air filter (a unique feature of the EVO HPA). Not only is connecting your airline a breeze, but you do not have to worry about unnecessary breakdowns caused by dirt and grit getting into the Inferno unit.
- Superior HPA technology (the EVO HPA features the best in HPA technology available today, achieved through our collaboration with Wolverine Airsoft who supplies our HPA units.
- Unique Hopup bucking optimized for HPA – designed and made solely by ActionSportGames.
- Single solenoid (electronic valve) system, improves air efficiency compared to dual solenoid systems used by competing brands.
- Open bolt function eliminates first-round dry fire. With the EVO HPA's open bolt the nozzle is always back, and ready for action.
- Instant trigger response; as with all HPA guns, there is an immediate trigger response, providing the shooter with a most satisfying experience when shooting the EVO HPA.

## EVO 3 A1 HPA specs:

- > Input pressure Range: 80-140psi
- > Input Voltage: 6-8V
- > Dwell time: Programmable for optimizing airflow to physical weapon setup
- > ROF: Programmable: Approx. 15-30 RPS
- > Burst: Programmable: Single only, 2, 3, 5, 7 rounds (Trigger tap max 3 shots)
- > Output Energy A1: 0.9 – 1.7 Joule
- > Output velocity A1: 95 to 130 m/s (312 to 426 f/s).
- > Filtered Input: 150 Micron
- > Air Connector: US type
